Client Profile

Business Name

SunNova Solar Solutions

Industry

Renewable Energy / Solar Energy

Business Type

Solar Installation Service

Location

Kerala, India

About the Business

SunNova Solar Solutions is a renewable energy business that provides solar energy and solar installation solutions for residential and commercial customers. The business aims to help customers adopt clean energy, reduce their dependence on conventional electricity, and make informed decisions about solar power systems.

Products & Services

- * Residential solar panel installation
- * Commercial solar panel installation
- * Solar system consultation
- * Solar system planning
- * Solar maintenance and support

Target Audience

- * Homeowners interested in installing solar panels
- * Small and medium-sized businesses looking to reduce electricity costs
- * Commercial property owners interested in renewable energy
- * Customers looking for reliable and sustainable energy solutions

Primary Business Goal

To generate qualified leads and increase customer enquiries for solar installation services through the website and digital marketing channels.

Business Positioning

SunNova Solar Solutions positions itself as a reliable solar installation service that helps customers reduce electricity costs while moving towards clean, sustainable energy.

Marketing Strategy and Customer Journey

Target Audience

Primary Target Audience:

Homeowners in Kerala who are interested in installing solar panels to reduce electricity expenses and adopt renewable energy.

Secondary Target Audience:

Small businesses and commercial property owners looking for reliable solar energy solutions.

Customer Needs

- * Reduce electricity expenses
- * Understand whether solar installation is suitable for their property
- * Get reliable installation services
- * Understand the installation process and benefits
- * Receive professional guidance before making a decision

Brand Positioning

SunNova Solar Solutions positions itself as a reliable and customer-focused solar installation service that makes the transition to clean solar energy simple and accessible for homes and businesses.

The brand focuses on reliability, clean energy, cost savings, professional service, and customer guidance.

Primary Marketing Objective

To increase awareness of SunNova Solar Solutions and generate qualified leads through its website, Google Search Ads, social media, and email marketing channels.

Customer Journey

1. Awareness

Potential customers discover SunNova through Google Search, social media, SEO, and online advertisements.

2. Engagement

Customers visit the website, read solar-related content, explore services, and learn about the benefits of solar energy.

3. Conversion

Interested customers click a Call-to-Action (CTA) such as “Get a Free Consultation” or “Request a Quote” and submit an enquiry.

4. Retention

SunNova maintains customer relationships through follow-ups, email communication, useful information, and customer support.

Digital Brand Identity

Brand Name

SunNova Solar Solutions

Brand Theme

SunNova represents clean energy, reliability, sustainability, and a brighter future through solar power.

Brand Colors

The brand uses a solar-inspired color theme, mainly focusing on green, yellow, and clean neutral tones.

Brand Personality

SunNova's brand personality is:

- * Reliable
- * Professional
- * Eco-friendly
- * Customer-focused
- * Simple and approachable

Brand Message

"Powering a cleaner and brighter future with solar energy."

Digital Presence

SunNova's digital presence includes:

- * Website
- * Google Search Ads
- * Meta Ads
- * Social media
- * Email marketing
- * Search engine optimization (SEO)

Brand Identity Goal

To create a professional, trustworthy, and recognizable online identity for SunNova Solar Solutions and connect with customers interested in solar energy.

Website / Landing Page Plan

Website Objective

The main objective of the SunNova Solar Solutions website is to provide information about solar installation services, build trust with potential customers, and generate enquiries from interested homeowners and businesses.

Page / Section	Purpose
Home	Introduce SunNova and communicate the main solar energy message.
About Us	Explain the business, its values, and commitment to clean energy.
Solar Services	Present residential and commercial solar installation services.
Benefits of Solar	Explain benefits such as energy savings and sustainable energy use.
Blog & Articles	Provide educational content and attract visitors through search engines.
Contact / Get a Quote	Allow interested customers to make an enquiry or request a consultation.

WEBSITE LINK:

<https://mhmdsahal20.wordpress.com/>

Homepage Structure

The homepage should follow this structure:

1. Hero Section

Heading: Power Your Future with Clean Solar Energy

Supporting text: Reliable solar installation solutions designed to reduce energy costs and build a more sustainable future.

CTA: Get a Free Consultation

2. Why Choose Solar?

Briefly explain the benefits of switching to solar energy.

3. Our Services

Show residential and commercial solar installation services.

4. Why Choose SunNova?

Highlight reliability, professional service, customer guidance and sustainable energy.

5. Educational Content

Display useful solar-related articles and guides. Your existing website already includes articles covering topics such as solar panel maintenance, roof readiness, battery vs. grid-tied systems, ROI and beginner solar guidance.

6. Call-to-Action

Encourage visitors to contact SunNova for a consultation or installation enquiry.

Landing Page Conversion Goal

The primary conversion should be:

Website Visitor → Reads Information → Trusts SunNova → Requests Consultation
Quote → Qualified Lead

Basic SEO Considerations

- * Use relevant keywords naturally in page titles, headings and content.
- * Create informative solar-related blog articles.
- * Write a unique meta title and meta description for important pages.
- * Use clear headings such as H1, H2 and H3.
- * Add descriptive alt text to relevant images.
- * Link related pages and blog articles internally.
- * Make the website mobile-friendly and easy to navigate.

Main CTA

“Get a Free Solar Consultation”

This CTA should be visible on the homepage and important landing pages to encourage potential customers to take the next step.

Keyword Research & SEO

Basic SEO Plan

SEO Title:

Solar Panel Installation in Kerala | SunNova Solar Solutions

Meta Description:

Discover reliable solar panel installation solutions in Kerala with SunNova Solar Solutions. Explore residential and commercial solar services and request a consultation.

Main H1 Heading:

Power Your Future with Clean Solar Energy

Suggested H2 Headings:

- * Reliable Solar Installation Solutions
- * Residential Solar Panel Installation
- * Commercial Solar Solutions
- * Benefits of Solar Energy
- * Why Choose SunNova Solar Solutions?
- * Get Your Solar Consultation

Keyword Placement

The priority keywords should be used naturally in:

- * Page titles
- * H1 and H2 headings
- * Website paragraphs
- * Service descriptions
- * Blog articles
- * Image alt text
- * Meta descriptions
- * Internal links

Keywords should be used naturally rather than repeatedly or unnaturally.

Internal Linking Strategy

Relevant pages should link to each other to help visitors and search engines navigate the website.

Example:

Solar Benefits Blog → Solar Services → Contact / Get a Quote

Residential Solar Page → Benefits of Solar → Contact / Get a Quote

Commercial Solar Page → Solar Services → Contact / Get a Quote

SEO Objective

The overall SEO objective is to improve SunNova's visibility for solar-related searches in Kerala, attract relevant website visitors, and convert those visitors into solar installation enquiries.

Keyword List

No.	Keyword	Type
1	Solar installation	Short-tail
2	Solar panels	Short-tail
3	Solar energy	Short-tail
4	Solar company Kerala	Short-tail
5	Solar panel installation Kerala	Long-tail
6	Best solar installation company in Kerala	Long-tail
7	Residential solar panel installation Kerala	Long-tail
8	Commercial solar installation Kerala	Long-tail
9	Solar panel installation for home	Long-tail
10	Cost of solar panel installation in Kerala	Long-tail
11	Benefits of solar energy for homes	Long-tail

Competitor Analysis

For SunNova Solar Solutions, I selected two solar companies operating in Kerala:

1. FGE Solar
2. Natural Grid

Both companies provide solar installation and related solar energy services.

Competitor Comparison

Factor	FGE Solar
Target Audience	Residential and commercial customers
Main Services	Solar installation, system design, KSEB coordination, subsidy assistance, and post-installation support
Website Approach	Strong service-focused website with clear CTAs such as free site visit and savings calculator
Content Approach	Educational information and detailed service pages
Lead Generation	Free quote, site visit, and savings calculator
Customer Trust	Highlights approvals, subsidies, and service capabilities

What SunNova Can Do Better

1. Provide Simple and Useful Information

SunNova can explain solar topics in an easy way through blogs and website content.

Examples:

- * How solar panels work
- * Solar installation cost
- * Solar panel maintenance
- * Benefits of solar energy
- * Common questions about solar installation

2. Use Clear Call-to-Actions

SunNova can make it easy for visitors to contact the business by using clear buttons such as:

"Get a Free Consultation"

"Request a Quote"

These can help convert website visitors into potential customers.

3. Build More Customer Trust

SunNova can add:

- * Customer reviews
- * Testimonials
- * Frequently Asked Questions (FAQs)
- * Previous project examples
- * Simple explanation of the installation process

This can make new customers feel more confident about choosing the service.

4. Focus on Local SEO

SunNova can target searches such as:

"Solar installation Kerala"

"Solar panel installation Kerala"

"Solar company Kerala"

This can help the business reach people who are actively looking for solar services in Kerala.

5. Use Social Media for Education

Instead of only advertising the service, SunNova can share useful solar content on Instagram and Facebook.

Examples:

- * Solar energy tips
- * Before-and-after installation posts
- * Solar facts
- * Customer experiences
- * Short educational videos

Overall Strategy

SunNova can stand out from competitors by focusing on:

Easy-to-understand information + Customer trust + Strong online presence + Local SEO + Clear CTAs

The main goal is to make it easy for customers to understand solar energy and take the next step towards installation.

Example Call-to-Action

“Thinking about switching to solar? Contact SunNova Solar Solutions for a free consultation and take the first step towards clean energy.”

Overall Social Media Strategy

SunNova will focus on educating customers first, building trust with potential customers, and then encouraging them to enquire about solar installation.

Paid Advertising – Google Ads & Meta Ads

Google Ads Campaign

Campaign Name: Solar Installation

Campaign Type: Google Search Campaign

Objective: Generate relevant traffic and potential leads for solar installation services.

Target Location: Kerala

Daily Budget: ₹100/day

Ad Group: Ad Group 1

Target Keywords

- * Home solar power system
- * Solar installation
- * Home solar panel
- * Residential solar panels
- * Solar energy for homes

Sample Ad

Headline:

Home Solar Panels | Solar Installation | Residential Solar

Primary Message:

Switch to solar and reduce your monthly electricity expenses. Get professional solar installation solutions for your home.

Call-to-Action:

Get a Free Consultation

Landing Page

The advertisement directs interested users to the SunNova Solar Solutions website, where they can learn more about solar energy and the available installation services.

Campaign Status

The Google Ads campaign was created as a training/practice campaign. At the time of preparing this project, the campaign showed 0 impressions, 0 clicks and ₹0 cost, so no performance results are being claimed.

home solar power system	₹0.00	0	0.00%
solar installation	₹0.00	0	0.00%
home solar panel	₹0.00	0	0.00%
residential solar panels	₹0.00	0	0.00%
solar energy for homes	₹0.00	0	0.00%

Meta Ads Campaign

SunNova Solar Solutions also uses Meta Ads as a social media advertising channel to create awareness about solar energy and reach potential customers in Kerala.

Campaign Objective

The main objective of the Meta Ads campaign is to increase awareness of SunNova Solar Solutions and attract potential customers interested in solar installation.

Target Audience

The campaign focuses on:

- * Homeowners in Kerala
- * People interested in solar energy
- * People interested in solar panels and installation
- * Small business and property owners interested in renewable energy

Ad Creative

The advertisement uses solar-related visual content to communicate the benefits of switching to solar energy and encourage users to learn more about the service.

Call-to-Action

Learn More / Contact Us

The CTA encourages interested users to visit the SunNova website or make an enquiry.

Campaign Status

The Meta Ads campaign was created as a training/practice campaign as part of the digital marketing learning experience. The campaign was not used to claim actual business results.

Analytics & KPIs

Analytics Tools

SunNova Solar Solutions can use Google Search Console and Google Analytics to monitor website performance and understand how users interact with the website.

Google Search Console helps monitor search visibility, clicks, impressions, CTR, average position, and search queries.

Google Analytics can provide information about website visitors, traffic sources, user engagement, and conversions.

Key Performance Indicators (KPIs)

KPI	What It Measures
Website Visitors	Number of people visiting the website
Impressions	Number of times the website or advertisement is shown
Clicks	Number of users clicking on an ad or search result
CTR	Percentage of impressions that result in clicks
Average Position	Average position of the website in Google search results
Engagement	How visitors interact with the website
Conversions	Important actions such as enquiries or consultation requests
Leads	Potential customers generated

Measurement Strategy

SunNova will regularly monitor website, SEO, and advertising performance. The data can be used to identify which keywords, advertisements, content, and channels are generating the most relevant visitors and enquiries.

The main focus will be on generating qualified leads rather than only increasing website traffic.

Google Analytics & Search Console Screenshots

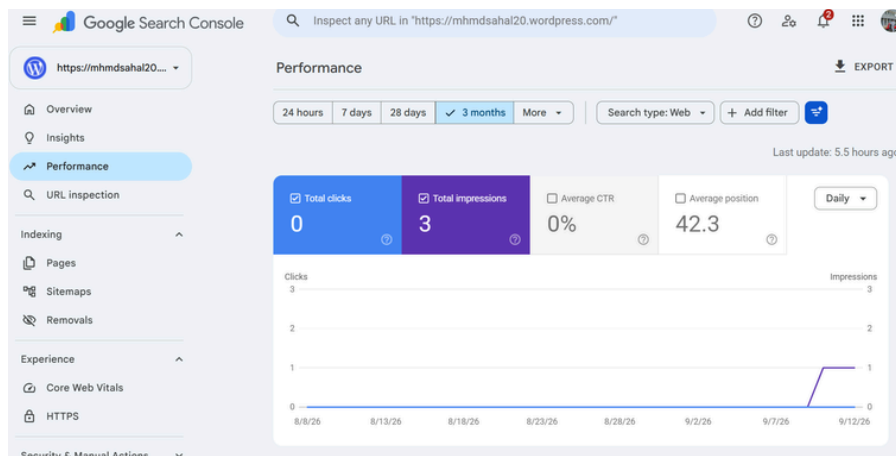

Figure 3: Google Search Console Search Queries

QUERIES	PAGES	COUNTRIES	DEVICES	SEARCH APPEARANCE	DAYS
Top queries ↑					
				↓ Clicks	Impressions
solar battery vs grid				0	3
Rows per page: 10 1-1 of 1					

Email Marketing

Email Marketing Objective

The main objective of SunNova Solar Solutions' email marketing campaign is to inform potential customers about solar energy, build trust, and encourage them to visit the website and enquire about solar installation services.

Target Audience

The email campaign targets homeowners and small business owners in Kerala who are interested in solar energy, reducing electricity expenses, and adopting renewable energy solutions.

Email Campaign

Email Marketing Platform: Mailchimp

Campaign Type: Promotional / Informational Email

Main Topic: Solar Energy and Solar Installation

Main CTA:
Get a Free Consultation

Email Content

Use the email content you already created in Mailchimp.

If you need a clean version for the project, use:

Subject Line:
Power Your Future with Clean Solar Energy ☀️

Email Heading:
Switch to Clean Solar Energy with SunNova

Email Body:

Looking for a smarter and cleaner way to manage your energy needs? SunNova Solar Solutions provides reliable solar installation solutions for homes and businesses.

Solar energy can help reduce dependence on conventional electricity while supporting a cleaner and more sustainable future.

Whether you are considering solar for your home or business, our team can help you understand your options and choose a suitable solution.

CTA:
Get a Free Consultation

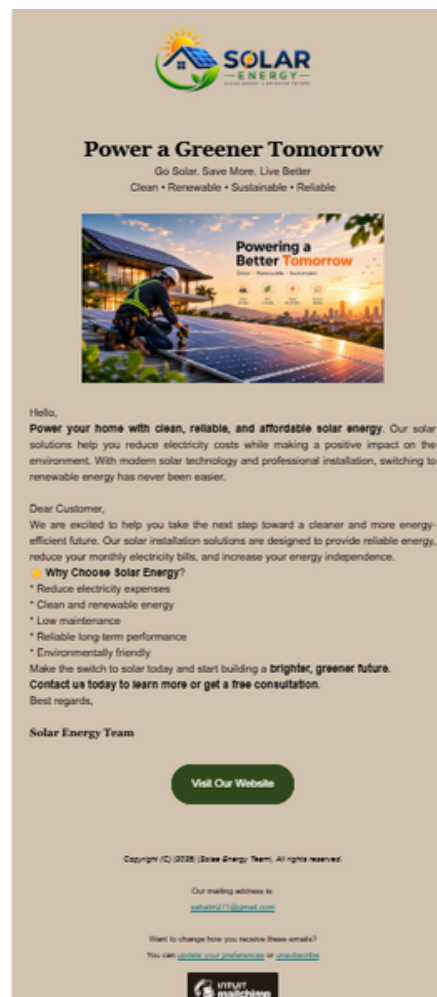

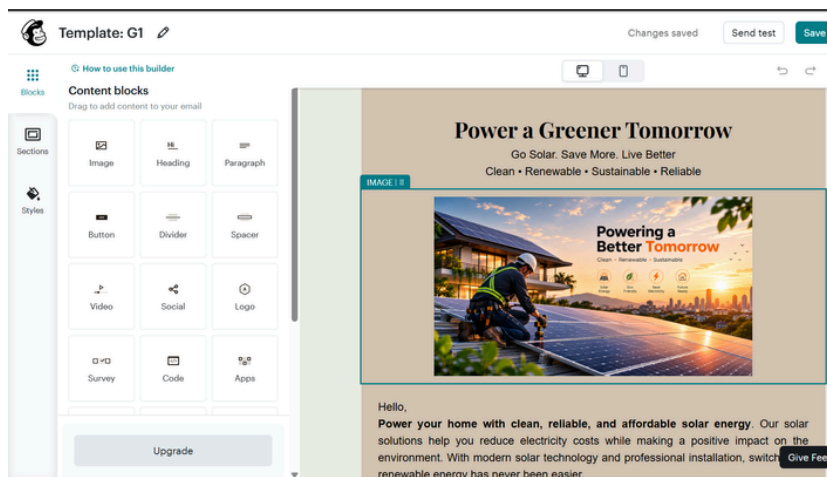

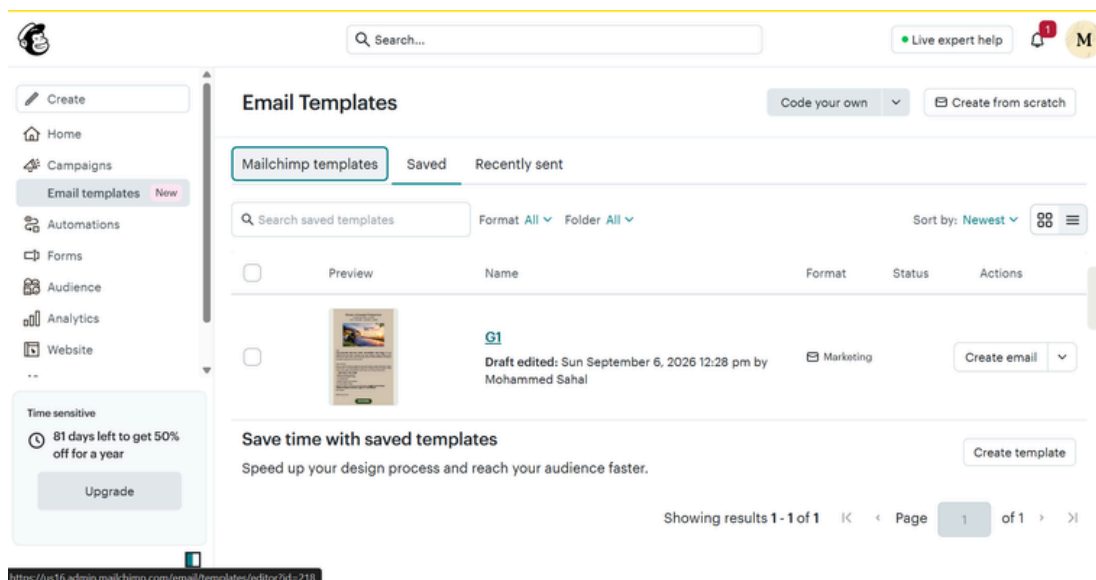

Landing Page

The email CTA directs interested users to the SunNova Solar Solutions website, where they can learn more about solar installation services and make an enquiry.

Email Marketing Strategy

The email campaign focuses on providing useful information rather than only promoting the service. By educating customers about solar energy and providing a clear call-to-action, SunNova can build trust and encourage potential customers to enquire about installation.

Affiliate Marketing

AFFILIATE / PARTNERSHIP STRATEGY

10.1 Affiliate Marketing

As part of the digital marketing training, an Amazon Associates affiliate account was created and used to understand how affiliate marketing works.

Affiliate marketing is a method where a business or website recommends relevant products through special affiliate links. If a visitor makes a qualifying purchase through the link, the affiliate may receive a commission according to the affiliate program's terms.

Affiliate Product Selection

A solar-related product was selected as part of the practical affiliate marketing activity.

The product is relevant to SunNova's target audience because it is related to solar energy and home energy solutions.

How It Can Be Used for SunNova

SunNova can recommend relevant solar products through educational blog posts and website content.

For example:

"Useful Solar Products for Your Home"

The article can explain the purpose and benefits of suitable products and include an affiliate link where appropriate.

Benefits of Affiliate Marketing

Affiliate marketing can help SunNova:

- * Recommend useful products to customers
- * Add value to website and blog content
- * Increase customer engagement
- * Create an additional digital marketing opportunity
- * Potentially generate affiliate commission

Affiliate Marketing Flow

Website/Blog → Product Recommendation → Affiliate Link → Customer Purchase → Possible Commission

Practical Training Activity

As part of the training, the Amazon Associates platform was explored, an affiliate account was created, and a relevant product was selected to understand the practical process of affiliate marketing.

Figure 1: Amazon Associates Affiliate Account Dashboard

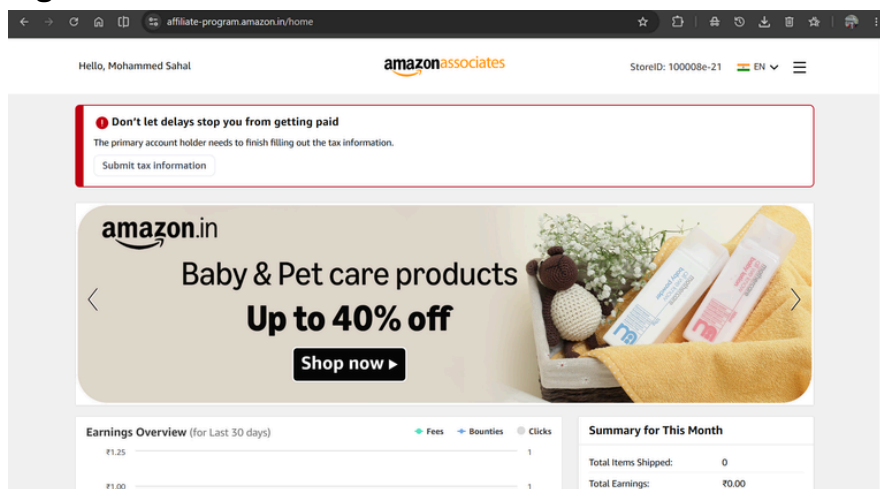

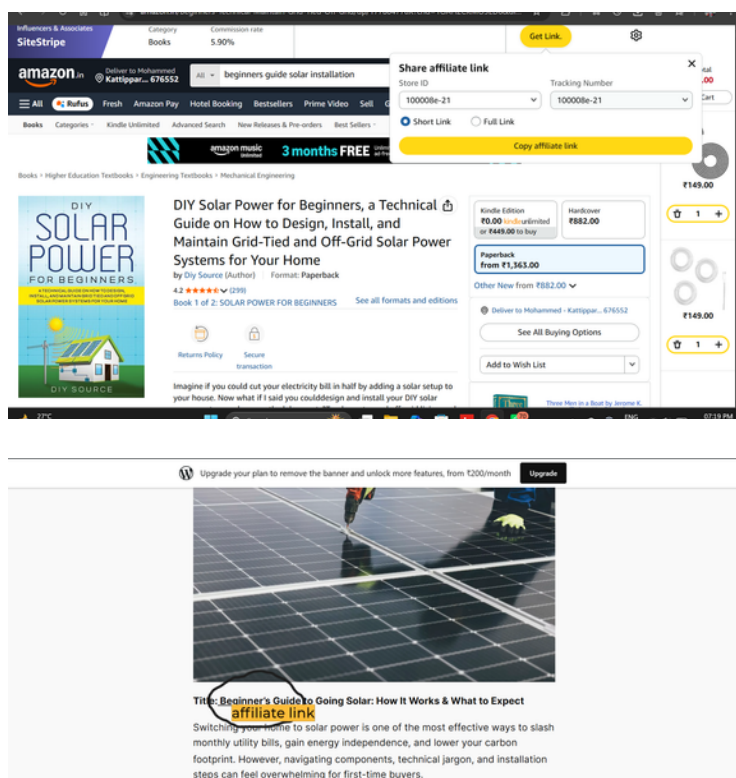

Figure 2: Selected Product and Affiliate Link

Online Reputation Management (ORM)

Objective

The objective of online reputation management is to build and maintain a positive and trustworthy online image for SunNova Solar Solutions.

Managing Customer Reviews

SunNova should encourage satisfied customers to leave genuine reviews on platforms such as Google Business Profile and social media.

The company should respond to both positive and negative reviews in a professional and helpful manner.

Sample Review Responses

Positive Review

Customer:

"Very good service. The installation process was smooth and the team explained everything clearly."

SunNova Response:

"Thank you for your valuable feedback! We are happy to know that you had a positive experience with SunNova Solar Solutions. We appreciate your trust and support."

Negative Review

Customer:

"I was not satisfied with the delay in completing the installation."

SunNova Response:

"We are sorry to hear about your experience. We understand your concern regarding the delay. Please contact our support team so we can understand the issue and work towards resolving it as soon as possible."

Question / General Feedback

Customer:

"Do you provide solar installation for homes?"

SunNova Response:

“Yes, we provide residential solar installation solutions. Please contact SunNova Solar Solutions for more information and a consultation based on your requirements.”

Reputation Management Strategy

SunNova will:

- * Respond to customer reviews professionally and promptly
- * Encourage genuine customer feedback
- * Address complaints instead of ignoring them
- * Avoid arguing with customers publicly
- * Share positive customer experiences where appropriate
- * Monitor comments and mentions across digital platforms
- * Use feedback to improve customer service

Goal

The main goal is to build trust, credibility, and a positive online reputation that encourages potential customers to choose SunNova Solar Solutions.

Final Recommendations

Recommendations for SunNova Solar Solutions

Based on the digital marketing activities planned and implemented, the following recommendations can help SunNova Solar Solutions improve its online presence and generate more potential customers:

1. Improve Local SEO

Focus on keywords related to solar installation in Kerala and regularly publish useful solar-related content.

2. Keep the Website Updated

Add useful information about solar installation, pricing factors, benefits, FAQs, and previous projects to make the website more helpful to visitors.

3. Continue Google Ads

Use Google Search Ads to reach people who are actively searching for solar installation services. Regularly review keywords and campaign performance.

4. Maintain Social Media Activity

Post regularly on Instagram and Facebook using educational posts, short videos, solar tips, and customer-focused content.

5. Use Email Marketing

Continue using email marketing to educate potential customers and promote relevant solar services and content.

6. Track Performance

Use Google Search Console, Google Analytics, and advertising platforms to monitor traffic, engagement, and leads.

7. Build Customer Trust

Collect genuine customer reviews and respond professionally to questions and feedback.

8. Use Relevant Affiliate Products

Recommend relevant solar products through useful website content where appropriate, while clearly disclosing affiliate relationships.

Expected Outcome

By combining SEO, website content, Google Ads, Meta Ads, social media, email marketing, analytics, and affiliate marketing, SunNova Solar Solutions can build a stronger online presence and create more opportunities to reach potential customers.

Conclusion

This mini project demonstrates how different digital marketing channels can work together for a solar installation business.

THANK YOU
